

UNIVERSIDADE  
FEDERAL DO CEARÁ

## Agreement between the Unione Matematica Italiana and the Universidade Federal do Ceará

The Unione Matematica Italiana (UMI) and the Universidade Federal do Ceará (UFC) in Fortaleza, Brazil, hereby jointly establish a procedure granting Visiting Student status at UFC to Italian PhD students with an excellent scientific profile.

- 1) UMI will select among the graduate students of Italian nationality students of the highest scientific stature who could visit UFC for one semester. UMI, with the help of UFC Department of Mathematics, will recruit a mentor at UFC for each such student.
- 2) UMI will communicate the names of the selected students and corresponding mentors, and the period of their visits, to UFC's Department of Mathematics ([depmat@mat.ufc.br](mailto:depmat@mat.ufc.br)) for approval and the necessary practical arrangements.
- 3) Each visiting student will receive a UFC ID Card, to be used for libraries, computer rooms and possibly for other facilities. In particular each visiting student will have an e-mail account and will be allowed to use a desk.
- 4) Each visiting student will be able to attend classes at UFC. The instructors of these classes may be asked to provide a declaration of the regular attendance and the proficiency of the student.
- 5) UMI will select at most two visiting students per year. The selection will be conducted at least six months before the beginning of the semester, noting that UFC's academic semester starts in March and August
- 6) The deadline and the instructions for applications will be posted on the UMI website <http://umi.dm.unibo.it>.
